(54) **WIRE HARNESS FOR DOOR AND ITS
MANUFACTURE**

(57) Abstract:

PURPOSE: To improve the workability by eliminating the assembly of parts through a working hole, the positioning of a connector, the inserting work of a water-proof grommet, and the attaching work of a water-proof sheet.

CONSTITUTION: A printing circuit body 45 is constituted by printing the circuit pattern 49 on a base resin plate. The printing circuit body 45 is adhered to an inner panel 35 which is formed separately from a door frame body 31 to realize the integration. A wire harness 79 for a door which is assembled by mounting the electric equipment 71 on the printing circuit body 45 is mounted on the door frame body 31.
